Devart dotConnect for MySQL Professional v10.1.33 (24 Feb 2026)

2026-04-08 11:59:23

is a premier ADO.NET provider, offering a comprehensive solution for MySQL-based database applications. With a history of 17 years, it integrates advanced features such as SSL and SSH connections, embedded server capabilities, and HTTP tunneling, ensuring robust connectivity and security. This provider is designed to enhance developer productivity through various GUI tools and seamless Visual Studio integration, facilitating efficient dataset management and application architecture design.

Furthermore, **Devart dotConnect for MySQL Professional** is compatible, supporting many MySQL versions, including Percona and MariaDB, across multiple platforms like .NET, macOS, and Windows. Its broad compatibility extends to Visual Studio versions from 2008 to 2022, ensuring seamless integration with the developer's preferred environment. Additionally, the connector boasts enhanced ORM support, incorporating a bundled visual designer, Entity Developer, and extending compatibility to popular ORMs such as Entity Framework, NHibernate, LinqConnect, and Dapper.

In essence, **Devart dotConnect for MySQL Professional** offers a feature-rich solution tailored for MySQL database development, combining advanced connectivity, productivity-enhancing tools, and extensive compatibility to empower developers in building robust and efficient database applications.

Key Features of **Devart dotConnect for MySQL Professional**:

1. Comprehensive ADO.NET provider for MySQL databases
2. Advanced features including SSL, SSH connections, embedded server, and compression protocol
3. HTTP tunneling support for enhanced security
4. GUI tools for dataset management, including DataSet Wizard, DataSet Editor, and DataSet Manager
5. Seamless Visual Studio integration (DDEX) for streamlined development workflows

所有软件资源 100%安全 已检测 无病毒 无篡改
