TMS FlexCel for VCL & FMX v7.26.0 (26 Mar 2026) for Delphi XE-13 Florence Full Source

2026-07-27 12:44:35

TMS FlexCel for VCL & FMX is a comprehensive suite of Delphi components tailored for Excel file manipulation, offering powerful capabilities for both VCL and FireMonkey platforms. With an extensive API, it provides native support for reading and writing Excel files, enabling complex spreadsheet creation and manipulation on Windows or macOS, even on machines without Excel installed. Its cross-platform compatibility extends to Win32, Win64, macOS, iOS, Android, and Linux environments.

This suite boasts full native support for creating and reading Excel file formats ranging from Excel 97 to the latest versions. XLS, .XLSX, and . XLSM. Moreover, offers seamless PDF report generation, HTML 5 file generation, and SVG export functionalities directly from Excel files. With a robust Report Engine, users can effortlessly design and modify complex reports within Excel, incorporating various elements like images, comments, conditional formats, pivot tables, and charts.

TMS FlexCel for VCL & FMX supports over 300 Excel functions for formula recalculation and includes the ApiMate tool for generating necessary Delphi/C++ code. Furthermore, it optimally leverages modern Delphi features like records with methods and generics, ensuring efficient and streamlined development. With comprehensive documentation, including guides, tips, full references, and numerous examples, **TMS FlexCel for VCL & FMX** offers a rich resource for developers aiming to excel in Excel file manipulation.

Key Features of **TMS FlexCel Studio for VCL & FMX**:

1. Cross-platform support: Win32, Win64, macOS, iOS, Android, and Linux
2. Native support for Excel file formats: XLS, XLSX, XLSM (Excel 97 - Excel 2023)
3. Native PDF report generation from Excel files (supports PDF/A 1, 2, and 3)
4. Previewing and printing of Excel files
5. Standards-compliant HTML 5 file generation from Excel files
