tshsoft - PanoramaStudio Pro:

PanoramaStudio Pro is an advanced solution developed for the effortless production and editing of panoramic images. It comes equipped with numerous features that support not only the assembly of exquisite panoramas but also allow thorough editing and refinement to be performed in later stages.

Some great features of tshsoft - PanoramaStudio Pro:

- Correction of exposure mismatches, brightness, and vignetting is automated.
- Offers multiple projection types for varied visual presentations, including spherical, cylindrical, and Mercator views.
- Supports over 2830 cameras and lenses by Exif data proprietary recognition.
- Enhances image quality by automatically correcting lens distortion attributed to the camera equipment used.
- Provides control point editor and masking tools for manual editing adjustments to enhance accuracy.
- Provides dynamic previews in 2D/3D with non-destructive filters applied.
- Real-time preview for all prior steps and editing filters shows results instantly.
- Panoramas and virtual tours can be exported as interactive HTML5 panoramas for local viewing or web embedding purposes.
- Image files in common formats and more than 1250 RAW format images can be exported and imported.
- A function that enables large-scale printing of posters is also available.
