is a simple yet powerful tool for converting Excel files between the older XLS format (Excel 2003) and the newer XLSX format (Excel 2007 and later). Whether you need to convert a single file or an entire folder of files, this converter makes the task quick and easy with its user-friendly interface. It also supports drag-and-drop functionality, so you can easily add files, and it integrates into the right-click menu in Windows Explorer for even more convenience.

The software's efficient multi-threaded engine ensures fast and smooth conversions, allowing you to pause, stop, or resume the process whenever needed. You can also save your conversion tasks as reusable project files, which can be run directly from Windows Explorer or through the command line, giving you flexibility in your work.

**Batch XLS and XLSX Converter** is designed to handle large numbers of files efficiently, making them ideal for businesses or anyone who frequently needs to switch between Excel file formats. Their easy setup and strong performance make them a must-have tool for anyone working with Excel spreadsheets across different versions.

### Key Features of Batch XLS and XLSX Converter :
