Devart dotConnect for Zoho CRM Professional v3.0.0 (18 Dec 2025)

2026-01-12 11:48:48

simplifies the integration of Zoho CRM data into .NET applications by providing seamless compatibility with standard ADO.NET and Entity Framework interfaces. With familiar ADO.NET classes such as ZohoConnection and ZohoCommand, developers can quickly access and manipulate Zoho CRM data without extensive learning curves. This streamlines the development process, reducing the need for excessive code and allowing developers to focus on building robust applications.

The tool's powerful design-time editors and tight integration with Visual Studio enhance productivity by making tasks like connecting to Zoho CRM and binding data grids effortless. By following simple steps in Server Explorer, developers can establish connections to Zoho CRM, specify credentials, and begin working with data right within the familiar Visual Studio environment. Smart tags make Data binding even easier, enabling developers to configure components without manual coding.

Devart dotConnect for Zoho CRM Professional offers the added convenience of SQL query support, allowing developers to perform operations like SELECT, INSERT, UPDATE, and DELETE using familiar SQL statements. This eliminates the need to learn and navigate complex Zoho CRM APIs, providing a more straightforward approach to data manipulation. Additionally, seamless integration with Entity Framework enables support for LINQ to Entities and simplified data persistence, further enhancing the tool's versatility and usability within .NET applications.

Key Features of **Devart dotConnect for Zoho CRM Professional** :

1. Seamless integration with standard ADO.NET and Entity Framework interfaces

所有软件资源 100%安全 已检测 无病毒 无篡改

ASP.Net .Net Components

2. Familiar ADO.NET classes for quick access to Zoho CRM data
3. Simplified development process with reduced need for extensive code
4. Powerful design-time editors for enhanced productivity
5. Tight integration with Visual Studio for effortless workflow
6. Simple connection setup in Server Explorer
7. Easy data binding with smart tags
8. Support for SQL queries, including SELECT, INSERT, UPDATE, and DELETE operations
9. Elimination of complexity associated with Zoho CRM APIs
10. Integration with Entity Framework for LINQ to Entities support
11. Simplified data persistence with a single SaveChanges() call
12. Bundled visual designer, Entity Developer, for enhanced Entity Framework support
