MindFusion WinForms Pack 2022 R1

2026-06-09 16:15:28

MindFusion.WinForms Bundle offers professional programming elements that cover the majority of the characteristics needed in a normal Windows Types business program. It features Diagramming (to create and present workflow, process diagrams, database entity-relationship diagrams, organizational charts; object hierarchy and relationship charts, etc.), Charting (with chart, line, area, bar, pie and doughnut elements), Virtual Keyboard (supply users with a feature-complete touch keyboard), Spreadsheets (for editing, styling, and formatting considerable quantities of information), Scheduling (a calendar and scheduling component) and Reporting for .NET (to layout, print and display various kinds of reports).

MindFusion supplies you with a quick and effortless method to include state-of-the-art flowcharts, calendars, spreadsheets, reports, maps, indicators, and charts. The package combines several multi-purpose programming tools that increase your application's attributes, which take weeks to develop.

MindFusion.WinForms Bundle provides you with a quick and effortless method to grow your application complex flowcharts, calendars, spreadsheets, reports, maps, graphs, indicators, barcodes, and keyboards.

MindFusion.Diagramming for WinForms - Construct any sort of diagram - from classical flowcharts into a lane diagram, hierarchy, a tree. A complex chemical synthesis scheme is readily created.

MindFusion.Scheduling for WinForms - A feature calendar control that's simple to customize.

MindFusion.Spreadsheet for WinForms - A highly effective .NET recorder component for editing, formatting, and styling considerable quantities of information.

MindFusion.Reporting for WinForms - Organize your information into refined, interactive, high-impact reports.

MindFusion.Charting for WinForms - If you want a 2D or 3D graph, a complicated judge, or an exact financial graph - it is all included, directly at your fingertips.

MindFusion.Mapping for WinForms - Represent the positioning of your offices globally, the regions where your goods are offered, your supply system, and a whole lot more.

MindFusion.UI.DockControl for WinForms - A WinForms design control developed and designed to satisfy the high criteria of your program.

Virtual Computer - Produce a next-generation WinForms program that offers customers a feature-complete touch keyboard. Enjoy the massive set of built-in computer keyboard designs, themes, and extensive API documentation to execute the controller in a brief while.
