# Steema TeeChart Pro VCL FMX v2026.46.260227 (27 Feb 2026) for Delphi 12-13 Florance

2026-04-09 10:01:29

In **Steema TeeChart Pro VCL FMX**, the demonstration provides a dashboard report comprising grid charts and Maps. For the purpose of interaction between the grid and the chart, in addition to chart tools, the 's attributes utilize the example. In this case, the dashboard reflects the activities of the revenue from a firm and its product in the market.

**Take Complete Control**

It takes complete control of the total Tee Chart Pro VCL along with the source code of FMX which can be offered for two users.

**Simple to use**

It is very simple to use and allows the discovering of the dialogues of the editor, it has accessible design time and runtime.

**Gauges collection is readily customized.**

The chart elements, which offer many gauges, provide the users with types and indexes that create a digital dashboard with effects such as shadow, lightning, etc.

## Key Features of **Steema TeeChart Pro VCL FMX** :

1. **IDE's Supported:** There is total support for the Embarcadero Windows IDE as well as the Fire Monkey framework, which allows the user to compare programs for windows, Mac OS, iOS, Android as well and iPhone. The support of the Embarcadero IDEs includes RAD Studio Delphi XE into the XE8, 10 Seattle, Berlin 10.1, Tokyo 10.2, Rio 10.3, and

VCL Components Delphi

Sydney 10.4. Delphi 7, Delphi C++, and RAD Studio 2007, 2009, and 2010, which includes the source code only. In this case, the Tee Chart is also utilized with the toolset of FMXLinux.

2. **Gauges:** The gauges can show the type and indexes such a circular, linear, knob, equalizer, numeric and last but not least the blend and it allows the process to make digital dashboards with some visual effects such as lighting, shadow, and a few more.
3. **Maps:** The maps provide a string containing maps of the continent of the Earth and the state, such as the United States of America, which has customized properties.
4. **Functions and Indicators:** The function that makes indicators, in this case, is it has 50 plus statistical and fiscal indicators, such as the conventional, which adds, subtracts, counts, high, low, divides, multiplies, averages, mode functions, and subsets. Financial which holds average directional index, moving average, exponential moving average, momentum, momentum division, compression OHLC, CLV, PVO, OBV, RVI, SAR, ATR, AO, variance function, percentage, alligator, and last but not the least Gator oscillator. The extended division has cross points, cumulative, exponential trend, curve fitting, reducing the number of factors, parameter functions, and smoothing the SpLine.
5. **3rd Party Compatibility:** It has 3d party compatibility, which has a coverage element along with other programs compatible with the Tee Chart, for example, the IntraWeb VCL, report Builder, Quick Report, Fast Report, RAVE, and so on.
6. **Data Connectivity:** It has data connectivity, and it is possible to easily link to the dataset on the user undertaking or the current database. The web source element for the process of recovering the information as well as Internet charts. It also provides charts with summaries, sorting, cross tabs, and document amounts.
7. **Chart Tools:** In the section of the chart tools, the Tee Charts include almost 52 tools that are being added for charting performance. Annotation, axis arrows, clustering, color band, axis breaks, Legend palette, series band, rectangle, rotate, series animation, sub-charts, Series region, drag Point, magnify, nearest Point, page number, video creator, and extra legend.
8. **Multi-language:** In the section of the multi-language, the Tee Chart editor dialogues are interpreted to about 38 languages. It requires just a mouse click, and its translation process may be used during the runtime and design time. The custom application types, as well as text, can be deposited.
9. **Fast and Memory Efficient:** The Tee Chart uses the arrays of the Intel assembler and the user's data as well as optimizes the speed.
10. **Supports Live Bindings:** The support live binding process is the live binding is a chart to a data set which is along with a data source as well as the Bind Scope DB that are attached. Some of the series are generated in this case.
11. **Visual Characteristics:** In the visual characteristics, we can see the color palette having three gradients, transparency, as well as grayscale. The 2D, 3D, and OpenGL 3D, with the spinning of 360-degree light and shadows, make custom drawing on the canvas possible.
