Microncode CSPhantomJS v1.0.3.0 (21 Apr 2020)

2026-09-09 11:34:19

The CSPhantom is nothing but a .NET and the standard library for the developers of the .NET that provides the permission to capture the entire web page with the use of the Phantom JS to the users and the developers from the C# as well as the VB.NET. The user has the ability to capture the webpage very high-quality GIF, JPEG, PNG, and even the image format of BMP, in order to set the height as well as the width to be captured with the use of the Async and sync capture and to get the preview of the web page which has been captured by the user and the developer end of a page in an easy and flexible manner with the use of the few source code.

The benefits of the CSPhantom are stated as below:

- It provides the users and the developers are very high-quality results.
- It has a pure Phantom JS wrapper for the users and the developers in order to capture the entire web page.
- It provides the user to get a preview of the results.
- It provides the user to capture the webpage in the format of JPEG, GIF, BMP, and even PNG.
- It has been built in the handling of the threads.
- It consists of a lot of relevant events for the users.
- It is known to have a safe exit.
- It is very easy to use.
- It has the ability to cut down the developing time for the user and the developer for up to 80%.
- The user can use it as a free or a commercial product.
- It permits the user to import the library to the user program and start the process immediately.
