Devart dbForge Schema Compare for SQL Server v2026.1.39 (15 May 2026)

2026-06-08 09:25:34

is the ultimate tool for comparing and synchronizing SQL Server database schemas. Its powerful and user-friendly interface streamlines the process, saving you valuable time and effort. With features like comparing live databases, SQL Server native backups, or script folders, and effortless synchronization of staging or production databases with development databases, it offers comprehensive schema management.

You can generate concise and accurate database deployment T-SQL scripts, restore functions and procedures from SQL Server native backups, and automate routine synchronization tasks with the command-line interface. Deploying to SQL Server, SQL Azure, and SQL Server on Amazon RDS is a breeze, and you can export schema comparison results to HTML, Excel, and XML while setting up database development with Continuous Integration.

One of its standout features is the well-designed interactive HTML Objects Diff Report. **Devart dbForge Schema Compare for SQL Server** allows you to navigate through a read-only HTML report effortlessly, keep track of the changes applied, and perform an in-depth analysis of DDL differences between objects. Viewing a deployment script is easy, making it a perfect choice for SQL Server schema management, whether you're a seasoned professional or just starting. With **Devart dbForge Schema Compare for SQL Server**, effortlessly generate an interactive HTML comparison report and take your SQL Server database management to the next level.

Key Features of **Devart dbForge Schema Compare for SQL Server** :

1. Live database comparison
2. T-SQL script generation
3. Easy deployment to SQL Server, SQL Azure, and SQL Server on Amazon RDS
4. Well-designed interactive HTML Objects Diff Report

所有软件资源 100%安全 已检测 无病毒 无篡改
