This Photoshop action script converts the famous art rickshaw paintings from Bangladesh into a Photoshop Actionscript. It is great for making your painting life easier. Our Photoshop script is perfect for those who are involved in digital printing or sell digital printing on other platforms. We have included all the details and the guideline in our video for those who enjoy painting. You can bet there isn't an action script like it. This is the first product we ever gave to you.

About Rickshaw painting Bangladesh:

When the entire body is painted, a rickshaw can look very elegant. A rickshaw maker must be creative when painting. The painter paints on the back of the tin sheet along with the frame of his body. Two types of painting are possible in ricksha: body painting and key visual, which can be painted on tin sheets. The artist's design skill and choice is represented by the painted tin sheet. The artist creates a design object for a rickshaw and then paints it into a full rickshaw. You can choose to paint a natural, religious, or film poster subject. There are many rickshaw drivers in Bangladesh. Different areas may have different artist choices and testing. Although enamel painting is a popular method for rickshaw painting, there are many artists who use computerized painting machines to paint. Also, government restrictions have reduced the production of rickshaws. Yet, enamel painting is still very popular in Bangladesh. Also, ricksha artists can paint wall matte posters and movie posters.
