What is Amped DVRConv?

Amped DVRConv is described to be a tool on the market with the help of which the process is going to be fast and easy. The dragging of the videos simply in a batch right into a specified folder or even onto the application window in order to see them automatically convert to format which is user-configurable. It is considered to be the easiest way in order to convert the unplayable video files, as well as the videos that are from the proprietary system of DVR which means digital video recorder as well as the closed-circuit television, dash cams, they can now be comforted with the use of a just a single mouse click. The users are capable of reassuring that the videos are being converted into a forensically sound manner with the use of the Amped software's powerful CCTV video conversion in jail that has the ability to preserve as much as it can, the original stream as well as the separator standard for the encoding of the information right from the proprietary metadata in order to avoid mistakes and errors as well as lost frames during the playback process. With the use of the Amped DVRConv as well as the Amped FIVE and Amped Authentication the user workflow from the scene to the laboratory is completely covered as well as they're capable of providing a great weapon in the user forensic video and the Arsenal of the image analysis. A lot of analysts as well as technicians are tasked with the process of retrieving video from the scene at location. The process of retrieving the CCTV from the DVR right at the scene can be laborious and it has the ability to save time during the recovery of the video seen which is crucial as well as the nightmare in order to have a trawl via the proprietary players. It is considering to be the simplest and the easiest way by which the user has the ability to convert the files that are unplayable. Users are capable of being assured that the movies are being converted with the utilization of the CCTV video conversion engine.
