# JavaScript Interop in ASP.NET Core Blazor - Ervis Trupja

2025-04-01 19:45:10

JavaScript Interop is pivotal for enriching Blazor applications with dynamic JavaScript functionality. empowers learners to seamlessly integrate JavaScript into ASP.NET Core Blazor applications, ensuring a robust and interactive user experience.

Throughout the course, participants will delve into the intricacies of JavaScript Interop in ASP.NET Core Blazor. Beginning with the fundamentals, learners will master invoking JavaScript functions from C#, navigating through asynchronous operations with finesse. Subsequently, **JavaScript Interop in ASP.NET Core Blazor - Ervis Trupja** navigates through advanced topics such as data transmission and event handling between JavaScript and Blazor components, fostering a deep understanding of inter-language communication.

Moreover, learners will gain proficiency in managing errors and debugging interop code effectively, equipping them with the tools to tackle complexities with confidence. By the course's conclusion, participants will possess the skills and insights necessary to implement JavaScript interop in Blazor applications, paving the way for creating dynamic, responsive, and resilient web solutions.

## JavaScript Interop in ASP.NET Core Blazor Table of contents:

1. Course Overview (Duration: 1 minute)
2. Getting Started with JavaScript Interop in Blazor (Duration: 14 minutes)
3. Calling JavaScript from C# (Duration: 38 minutes)
4. Calling C# from JavaScript (Duration: 23 minutes)
5. Error Handling and Debugging JavaScript Interop in Blazor (Duration: 35 minutes)
