Quick 'n Easy Web Builder v12.3.1 (20 Apr 2026) for Win x86 & x64

2026-04-23 09:38:53

Quick 'n Easy Web Builder is a comprehensive web design tool compatible with Mac, Linux, and Windows, offering a versatile feature set for creating stunning websites. Notable features include responsive web design, pre-made blocks for quick starts, and support for web fonts. Version 10 introduces over 125 new features, such as a dark color scheme, protected content options, and customizable scrollbars, enhancing the software's capabilities for efficient and visually appealing website creation.

Distinguishing itself from online content management systems like WordPress, Drupal, and Joomla, provides easy installation, offline work capability, improved performance with static HTML pages, heightened security, and the freedom to create unique designs without template restrictions. Compared to desktop web design tools, **Quick 'n Easy Web Builder** stands out by supporting various layout methods, eliminating the need for programming knowledge, staying up-to-date with industry trends through regular updates, and offering excellent value for money. Its user-friendly drag-and-drop interface ensures that beginners and professionals can create visually appealing and functional websites without coding expertise.

Key Features of **Quick 'n Easy Web Builder** :

1. Cross-platform compatibility for Mac, Linux, and Windows.
2. Responsive web design with support for layout grid, flexbox, CSS grid, or fixed layouts.
3. Integration of web fonts, including Google Fonts and others.
4. Over 150 pre-defined animations and the option to create custom animations.
5. More than 150 pre-made blocks for rapid website development.
6. Comprehensive forms tools, including email sending, file uploading, and data storage.

Web Design Tools

7. Image and media tools with filters, shapes, galleries, carousels, and video/audio support.
8. Icon library support, including Font Awesome and Material Icons.
9. Diverse navigation options like buttons, dropdown menus, and mega menus.
10. Dozens of extensions for added functionality, such as slideshows and e-commerce support.
11. One-click publishing without the need for external FTP programs.
12. User-friendly drag-and-drop interface for visual website design.
13. SEO tools like sitemap and robots.txt generation, along with an SEO Assistant.
14. Multi-user login tools, password protection, and content management system.
15. Integrated support for third-party e-commerce solutions like PayPal and Ecwid.
16. New enhancements include a dark color scheme, protected content, and responsive text.
17. Additional features: tooltips, progress bars, mouse effects, sections, and styles everywhere.
18. Customize scrollbars, image comparison sliders, floating labels, and other improvements.
19. Fast and efficient website creation without the need for extensive coding knowledge.
