We suggest you take an in-depth look at the live preview and learn more about the included features!

OneUI - Bootstrap Admin Dashboard Template & Laravel Starter Kit Great Features:

The latest Bootstrap version now powers the OneUI framework. Notable new features and utilities are ready for you to use.

OneUI was built with Sass, overriding and intelligently extending Bootstrap to ensure a perfect and modular workflow.

OneUI was built with ES6, the new major JavaScript release, enabling us to write cleaner and better code. No jQuery in the core.

OneUI comes packed with one of the most popular icon sets, bringing you over 1300 freshly made icons for your projects.

We created intelligent development tasks to help you focus on your projects. Just install the npm dependencies and use them out of the box.

Babel makes your JavaScript code compatible with older browsers, and webpack bundles your JavaScript files.

It will serve and sync your project across different browsers and refresh them each time you save your files.

Peace of mind when working with Sass. Using the latest CSS syntax and Autoprefixer will auto-add any required prefixes for older browsers.

You can add your JavaScript or Sass overrides/customizations without altering the original files, making the update process easy.

Small touches and improvements were introduced throughout the template, from colors to layout and custom elements to

plugins.

It is finally here and looks fantastic! Carefully integrated and made to work with all color themes and included pages. You will love it!
