Scrutiny v12.11.0 for macOS

2025-05-22 10:12:45

Scrutiny for macOS is a comprehensive website crawl-and-report tool designed for Mac users. It offers a range of features to assist in website management, including link checking, HTML validation, SEO analysis, sitemap creation, and accessibility testing. The application's interface allows users to organize sites into folders, with an autosave feature providing easy access to previous scan results.

Powered by a fast and efficient crawling engine native to macOS, Scrutiny can handle large websites without compromising speed. The tool provides extensive options for customizing and limiting the crawl, allowing users to blacklist or whitelist specific URLs and tailor various parameters. Scrutiny supports link checking, rendering pages before scanning, and even scanning PDF or DOCX documents to identify links.

conducts SEO audits, highlighting issues such as missing SEO parameters, duplicate content, keyword stuffing, and more. It also features HTML validation for site-wide checking, accessibility testing for ADA/WCAG compliance, and a spelling and grammar checker. **Scrutiny for macOS** generates detailed reports with charts, key statistics, and customizable headers and footers, facilitating easy analysis and sharing of results.

Additionally, **Scrutiny for macOS** supports scheduling scans for regular website checks and offers cross-platform compatibility, making results accessible on Windows, Linux, and mobile platforms. The tool's versatility, user-friendly interface, and robust feature set make it a valuable resource for website administrators and developers.
