What if I gave you an easy way to access it?

My name is Vishal. I've been designing covers for various documents and cover art for more than two years, so this ability has become second nature for me.

The course is a collection of brief, simple-to-follow non-technical courses specifically designed for people who are just beginning their journey.

The benefits of this class:

- All features of GIMP are covered in this class, and workflow hacks are shown!
- The language is not jargon-free and caters to the needs of people who are just starting.
- Questions and Answers Included.
- Step-by-step Walkthrough.
- All Operating Systems are Covered!
- Regular updates.

Learn all you can about designing as well as sophisticated techniques and tips.

I'll guide you through the procedure step-by-step. It doesn't matter which operating system you're running, and I've tried to give you the details you require to start immediately. From the import of an external file to getting the final, polished design, it is all included!

This course is ideal for those who wish to produce professional-looking graphics but don't know how to start.

- Making GIMP is your First Project in GIMP
- Tips for a better workflow to cut down on time
- Adding Special Effects
- Working with Documents
