FastReport FMX v2025.2.2 (18 Sep 2025) for Delphi XE2-12 Athens Full Source

2026-05-04 18:01:03

FastReport FMX seamlessly integrates into applications across macOS, Linux, and Windows platforms, providing Business Intelligence capabilities through Embarcadero RAD Studio XE's FMX library. Its visual report designer offers extensive customization options, including multi-level banding, code-based reports, and interactive features like drill-down reports. Output flexibility is ensured with support for various formats such as PDF, HTML, and CSV, making it ideal for diverse reporting needs.

boasts Unicode compatibility, localization for 32 languages, and full source code availability for easy adaptation and customization. Its cross-platform functionality empowers developers to efficiently generate reports and manage documents across different operating systems, enhancing the usability and engagement of their business applications.
