Winsoft JDBC for Android v4.1 for Delphi & CB 10.4-12 Athens Full Source

2024-12-18 23:01:45

is a Java Database Connectivity (JDBC) library explicitly crafted for the Android platform. This versatile library provides JDBC drivers tailored for H2, Microsoft SQL, Sybase SQL, and PostgreSQL databases. It seamlessly integrates with Delphi/C++ Builder versions 10.4 through 12, and the registered version includes access to the complete source code. Furthermore, users benefit from royalty-free distribution rights, allowing the incorporation of these components into applications without additional costs.

Key Features of **Winsoft JDBC for Android**:

1. JDBC drivers designed for H2, Microsoft SQL, Sybase SQL, and PostgreSQL databases
2. Compatibility with Delphi/C++ Builder versions 10.4 through 12
3. Inclusion of source code in the registered version
4. Royalty-free distribution rights for seamless integration into applications
