Lightroom Presets are unlike any other! Goodlight Presets Pack 3 includes six unique profiles that will fit your style. It's a simple preset! Goodlight presets are called enhanced profiles, which means that each of the 6 presets can be endlessly customizable via the slider of the amount.

The most sophisticated filmic presets available, however, with Goodlight advanced doesn't necessarily mean complicated! The interaction with color and tonality is different from any other Lightroom preset. They reflect the true colors of the film while keeping the clarity. Digital technology has many advantages.

### 6 PROFILES UNIQUES

We are awestruck by color and we are a fan of diversity. That's why we created Goodlight presets. Although we'd love we had an all-purpose editing solution, we are aware that it is essential to select the best tool to accomplish the task. Our six presets will cover all lighting situations.

### Installation Guide

Installing these profiles and presets is simple (especially when compared to the process of assembling IKEA furniture) with the included installers that work on both MAC or PC... We provide a link to an instructional video on the steps to set everything up. Who doesn't love YouTube?
