Your first challenge will be to design a phone that can turn 360 degrees around its axis. It is this exercise can help you that you can rotate any object of any size.

After that, you'll be able to create more complicated three-dimensional objects, such as a UFO or a house. This will teach you how to create authentic 3D objects that appear like

Then you'll design characters, beginning with the head and moving to the point of the foot, and learn how to move its components independently. This will also teach how to play characters with hair that is long.

In the end, using the elements you've designed in the course, you'll create an underlying depth scene with interactions between the elements.

You will make an animation where you can fake 3D animation techniques you learned in the course in your chosen setting.

Illustrators, designers, animators, and everyone interested in working using After Effects wants to leap learning methods to add the illusion of depth and three-dimensionality to their work in a straightforward method.
