Microdose Marketing Website Booster Solopreneur Standard v1.0.0 for Win x64 Pre-

2026-04-08 10:20:16

Microdose Marketing Website Booster Solopreneur Standard is a single-use SEO audit tool that enables you to boost your online rankings without subscribing to it on a monthly basis. It runs a scan on your site, identifies both technical and content-related search engine optimization issues, and gives you guidelines in easily comprehensible language on how to rectify these issues by yourself. It does not require the expertise of a professional; all is written in a way that can be understood by any normal website owner or individual business owner.

The difference lies in the "Microdose Method." The tool does not require you to do three hundred tasks at once, but rather divides your SEO work into very tiny tasks that you can complete daily (30 minutes). Every task presents you with what to do, where to do it, and the reasons why it is important. This simplifies, relaxes, and achieves the practice of SEO, particularly when you are operating your business solo.

The **Microdose Marketing Website Booster Solopreneur Standard** is fully offline and does not upload your data anywhere, and as such, all your privacy is safeguarded. You are able to perform unlimited audits on unlimited sites and give out professional PDF reports. Better still, you pay once, and no payment every month, no credits, no restrictions.

Key Features of **Microdose Marketing Website Booster Solopreneur Standard**:

1. **DIY SEO Report** – A complete website audit with step-by-step instructions written in plain English.
2. **Microdose Task Calendar** – Your SEO fixes organized into easy 30-minute daily tasks.
3. **Technical SEO Scanner** – Detects broken links, meta tag issues, crawl errors, mobile problems, and more.
4. **Content Quality Checker** – Finds thin content, readability issues, and keyword over-usage.
5. **Local SEO Review** – Checks business name, address, phone consistency and local schema setup.
6. **Image SEO Audit** – Identifies missing alt text and large or unoptimized images.
7. **Structured Data Validator** – Tests schema markup and rich-result eligibility.
8. **Modern SEO Signals** – Evaluates E-E-A-T trust signals and AI-search readiness.
9. **Site Architecture Review** – Analyzes internal linking and discovers orphaned pages.
10. **Accessibility Checker** – Reviews WCAG compliance and screen-reader compatibility.
11. **Google Search Console Import** – Adds real search data for deeper insights.
12. **Unlimited Audits & Crawls** – No limits on websites or pages scanned.
13. **Professional PDF Export** – Create clean reports you can save or share.
14. **Privacy-First Offline Software** – Your data stays on your computer only.
15. **One-Time Purchase** — No Subscription – Buy once, own it forever with free updates.
