Cartoon Character Design with Procreate: Hello, everyone; I'm Giorgio. I'm teaching you how to make an original cartoon character using Procreate in this class.

This class is perfect for anyone just beginning to understand how to think of ideas and acquire the essential abilities to create original, stunning cartoon characters.

In the class, I will guide you through the instruction process and demonstrate how to complete each step to ensure that you can learn everything and experience first-hand the process of creating a character from the initial sketch to the final illustration.

In this class, you will be taught:

- How do you create ideas for your creation
- Procreate's A-Z order to create your design
- How do you proportionally create your character and communicate emotion
- How do you sketch and draw your design
- How to color your character, highlight and shadow its character to create real-life 3D effects.

Additionally, an additional video will teach you everything about drawing already existing images using procreate. This is an excellent way to create new characters!
