Macrium Reflect X Server Plus v10.0.8843 for Win & WinPE (x64)

2026-04-15 16:33:36

is a powerful backup tool that protects critical business servers that run important applications like Microsoft Exchange and SQL databases. It allows IT professionals to quickly set up and manage backups, ensuring that essential data and systems are secure and can be easily restored in case of failure. Whether you're backing up individual files or entire Windows operating systems, this solution offers reliable recovery options, keeping your business running smoothly.

The software is built for commercial environments, where maintaining the integrity of business-critical data is key. With advanced features like instant virtual booting, rapid delta restore, and cloning, Macrium Reflect X Server Plus helps speed up recovery and cloning processes. It also supports physical and virtual server backups, ensuring flexibility in any setup. Moreover, it includes ransomware protection, keeping your backups safe from attacks.

Macrium Reflect X Server Plus also provides premium support for business users, including phone and email assistance, ensuring help is available. With its granular recovery options for Microsoft Exchange mailboxes and continuous backup for SQL databases, the software provides comprehensive server and application coverage. Plus, it supports a wide range of Microsoft Exchange and SQL Server versions, ensuring compatibility across different platforms.

Key Features of **Macrium Reflect X Server Plus** :

1. Instant Virtual Boot: Quickly create and manage virtual machines from backups, minimizing downtime in case of failures.
2. Rapid Delta Restore: This method restores your system in minutes by copying only the changed parts of your data, speeding up recovery.
3. Rapid Delta Cloning: This method accelerates the cloning process by copying only the differences in file systems, saving time and resources.

所有软件资源 100%安全 已检测 无病毒 无篡改

Tools Applications

4. Incremental Forever & Synthetic Full Images: These features minimize storage usage by only backing up changes after the first full backup.
5. Physical & Virtual Server Backup: Offers flexible options to back up both physical servers and virtual environments.
6. Dissimilar Hardware Recovery (ReDeploy): This method restores backups to completely different hardware setups, making hardware upgrades or replacements seamless.
7. Ransomware Protection (Macrium Image Guardian): Protects your backup files from being altered or encrypted by ransomware.
8. Granular Recovery: Recover individual mailboxes or emails from Microsoft Exchange without restoring the entire system.
9. SQL Continuous Backup: Ongoing backup for SQL databases, ensuring up-to-date data protection.
