AI Transcription v2.15 for macOS

2026-04-08 14:48:19

Transcribing your audio and video files with **AI Transcription** is so simple and precise, and your information remains truly confidential. It utilizes Whisper to recognize voices that have accents, contain background noise, or employ technical or specialized language, with the assistance of OpenAI. And whether you are dealing with podcasts, lectures, meetings, or voice memos, it provides quick and accurate results right on your Mac, with no internet connection necessary.

AI Transcription features a drag-and-drop interface, automatic transcription, and all of this is done on an offline basis to ensure the utmost privacy. Export results to any of the above file formats, browse by time, word, or sentence, and experience a smooth and lightweight experience that is both powerful and easy to use.

Key Features of **AI Transcription**:

1. **AI-Powered Transcription:** Uses OpenAI's Whisper technology for highly accurate speech recognition.
2. **Automatic Processing:** Just drag and drop your audio or video files—no setup required.
3. **Fully Offline & Private:** Your audio never leaves your Mac; everything happens locally.
4. **Handles Any Voice or Environment:** Works reliably with accents, noise, or technical speech.
5. **Simple & Lightweight:** Clean design that's easy to use, yet packed with professional power.
6. **Flexible Export Options:** Save transcripts as TXT, CSV, SBV, SRT, or WEBVTT for any use.
7. **Custom Segmentation:** Split transcriptions into words, sentences, or timed sections for subtitles.
8. **Broad Format Support:** Works with MP3, WAV, CAF, AIFC, M4A, and MP4 files.
