Mastering Lettering Design in Photoshop: From Inspiration to Wall Art & Beyond: Welcome to my class, where I'll guide you through creating a stunning Lettering Design in Photoshop. In today's world, lettering is ubiquitous – it graces posters, pillows, coffee mugs, and more. We all adore those affirmations on our everyday products, don't we? The best part is that you can create them yourself!

In this class, we'll use the quote "Leave a little Sparkle" and craft it in Photoshop using a font duo. I'll walk you through installing the fonts, combining them harmoniously, and designing your quote. Additionally, I'll share where you can source materials for your design work, and we'll create mockups together to present your designs professionally.

You can use the quote for various projects – from wall art to pillows for your loved ones or even on tote bags or cards. The possibilities are endless!

The foundation remains the same: assembling and exporting your quote in the correct file size and format. These are just some essential skills I'll teach you in this class. So, let's dive in and unleash your creativity!
