Macro Recorder v4.0.51

2026-04-08 10:26:54

Macro Recorder is a user-friendly automation tool that records and replays mouse and keyboard actions, streamlining repetitive tasks on Windows and Mac computers. Acting like a tape recorder, it captures movements, clicks, and keystrokes, allowing users to create precise automation scripts effortlessly. The built-in editor enables easy review and modification of recorded actions, providing flexibility in refining automation processes.

This versatile tool integrates OpenAI and ChatGPT for added artificial intelligence, enhancing automation capabilities. It serves as a comprehensive desktop automation solution, supporting tasks such as reading barcodes, automating web actions, and extracting text using on-screen OCR. With features like dynamic click position location, consistent window management, and smart mouse recording for smooth movements, **Macro Recorder** caters to diverse automation needs.

Macro Recorder stands out as a "no-code automation" solution, eliminating the need for programming expertise. It visualizes recorded mouse paths and clicks, simplifying the editing process. Combined with "PhraseExpress," it forms a powerful automation suite with organizational features, sharing capabilities, hotkey triggers, and additional text automation functionalities. Whether for automated software testing or simplifying daily tasks, offers a comprehensive and accessible solution for users across various skill levels.

Key Features of **Macro Recorder**:

1. Capture and replay mouse and keyboard actions
2. Acts like a tape recorder for easy automation
3. Built-in editor for reviewing and modifying recorded actions
4. Repeat recorded actions as needed
5. Adjustable playback speed and smooth mouse movements
6. Integration with OpenAI and ChatGPT for added artificial intelligence

Tools Applications

7. Desktop automation for Windows and Mac
8. Reads barcodes and QR codes
9. Web automation for browser actions
10. On-screen OCR for text extraction
11. Mouse Recorder for capturing mouse actions
12. Keyboard Recorder for recording text and keyboard inputs
13. Dynamic click position location during playback
14. Consistent window sizes and position maintenance
15. Smart Mouse Recorder for transforming erratic movements
16. Visual representation of mouse paths and clicks for easy editing
17. No-code automation solution for a user-friendly experience
18. Combines with "PhraseExpress" for a comprehensive automation suite
19. Organize macros in a tree structure
20. Share macros with other users in the network
21. Trigger macros with hotkeys or text shortcuts
22. Suitable for automated software testing and daily task simplification.
