### Most essential instruction:

- How to Select the Subject In this section, we are going to make a choice of our difficulty and then reproduction the situation to a separate layer. Choose the Quick Selection Tool (W) and choose the heritage of the photo. Use the Shift-Alt buttons on your keyboard to add or subtract areas from the selection. After you have made an ideal selection, press Control-Shift-I on your keyboard to invert the selection. Now go to Select Modify Smooth and set the Sample Radius to 5 px. Next, go to Select Modify Contract and set Contract By to two px. Finally, go to Select Modify Feather and set Feather Radius to two px.
- For the true end result first, you want to extract your canvas area. Simply pick your historical past photo and take crop equipment then extend three sides. For extra important points observe the PDF Help file. Then resize your pix 3000x2000px or 2000x3000px dpi 300.
- Open your picture take a new layer then rename “paint”( in lowercase). Then pick out a gentle brush and paint your image. Close the "paint" layer eye and maintain the decision "paint" layer Then click on the motion play button.
