Are you looking for ways to take your photography to the next stage?

Take a look at My Pro Cinematic Color Grading Presets for Lightroom! These presets were designed to assist you in creating stunning photos that look professional with just a couple of clicks.

- 8 MIDTONES BLUE
- 3 MIDTONES GREEN
- 9 MIDTONES ORANGE
- 10 MIDTONES RED

If you already have my other preset packs for Lightroom and Photoshop, you'll be delighted to learn I have Color Grading Presets that can be used with these. This means you can create many different styles for your photographs.

These presets were created to serve you as a basis for editing. I recommend you make adjustments to the presets according to your needs. Each image is not the same, all light sources differ, and you can use them in conjunction with my other packs of presets designed for Lightroom

- The pack was designed for and by Lightroom only
- Within the pack, you will inside the pack you will find files "How to install."
- Works are compatible with Mac as well as Windows versions of Lightroom
- Format files in Xmp format
- Created using Lightroom Classic 12.2 (2023)
- Presets can be used with Jpeg or Raw files, but I suggest using Raw files for the best quality and outcomes.

What is a Cinematic Colors Presets Pack?

A "Cinematic Colors Presets Pack" is a collection of color grading presets or filters designed to enhance the visual aesthetics of videos and photos, giving them a cinematic look and feel. These presets are typically used in video editing and photo editing software to apply specific color adjustments to achieve a desired cinematic style or mood. Each preset is like a preconfigured set of color grading parameters that can be applied with a single click, saving time and effort for video and photo editors.
