How to Create RAZOR SHARP Landscape Photos – The Complete Focus Stacking Masterclass: Have you ever struggled to achieve razor-sharp focus from the foreground to the background in your photos? Have you ever marveled at how professional photographers consistently produce images with impeccable clarity throughout? Look no further—this course unveils the secret to those ultra-sharp, professional-quality images: focus stacking.

Join landscape photographer and outdoor educator Meredith Fontana in a comprehensive course designed to demystify focus stacking, an essential technique to enhance the depth of field in your images. No longer will you be puzzled by the process; Meredith breaks it down into simple, easy-to-understand steps.

In this course, you will:

- Master creating incredibly sharp images through exposures with different focus points.
- Learn the basics of focus stacking, including optimal camera settings and when to employ this technique.
- Discover two effective ways to export photos from Lightroom to Photoshop for focus stacking, incorporating Adobe Bridge and Camera RAW.
- Uncover the simplicity of focus stacking using Photoshop's auto-blend feature.
- Dive into focus stacking using layer masks for more control over your final image.
- Make basic edits to a focus stack in Lightroom and Adobe Camera Raw.
- Explore advanced focus stacking techniques, incorporating exposure blends, time blends, and long exposures into your focus stack.
- Troubleshoot and fix focus stacking errors in Photoshop.

This course caters to:

- Landscape photographers and enthusiasts at all skill levels.
- Those eager to enhance their photography through post-processing techniques.
- Beginners seeking an introduction to focus stacking.
- Intermediates familiar with Lightroom and Photoshop basics.
- Advanced photographers are looking to deepen their understanding of focus stacking.

Requirements for this course:

- Adobe Lightroom Classic and Photoshop are installed on your computer.
- Basic understanding of Lightroom Classic's navigation and development module.
- Basic understanding of Photoshop, including working with tools and layers.
- Familiarity with Photoshop layer masks (helpful but not mandatory).
- No prior knowledge or experience with focus stacking is required.
- Optional: Adobe Bridge installed on your computer.
- Optional: at least two photos of a single composition (preferably in RAW format) for practice; practice photos will be provided in the course resources if needed.

Embark on this journey to sharpen your focus and elevate your photography through the transformative focus stacking technique. Enroll today and witness the difference in your visual storytelling.
