Draftable Desktop v26.3.200Pre-Activated

2026-04-14 15:29:25

is a powerful document comparison tool that allows you to compare PDF, Word, PowerPoint, Excel, and text files right on your computer. It ensures complete privacy and security by processing all comparisons locally, so your documents never leave your device. This makes it ideal for sensitive documents, allowing you to see differences between files without relying on the internet.

You can compare various file formats and even export the results as a password-protected PDF, making secure collaboration simple. Whether you're working with colleagues internally or sharing with external partners, Draftable helps streamline document reviews while keeping your information safe. Its flexibility allows you to view comparisons using your preferred PDF viewer.

Draftable Desktop's key features enhance your document review process. The side-by-side view keeps your documents in sync as you scroll, while the single-page view highlights all changes in a redline format. You can also view a list of all changes and jump directly to each one in the document. It supports not just content comparison but also changes in text styles, ensuring that no detail is missed.

Key Features of **Draftable Desktop** :

1. Side-by-Side View: Compare two documents side by side, with automatic syncing as you scroll through them.
2. Single Page View: See all changes in a single redlined view for a more focused review.
3. Change List: Get a summary of all changes in one place, and click on any change to jump to its position in the document.
4. Export to PDF: Easily export comparison results as a PDF, with the option to password protect the file for secure sharing.
5. Content & Text Style Changes: Detect not only differences in text but also changes in font style, size, and formatting like bold or italics.
6. Enterprise Ready: Reliable and tested on millions of documents, with service guarantees for businesses.
