SOUND EFFECTS
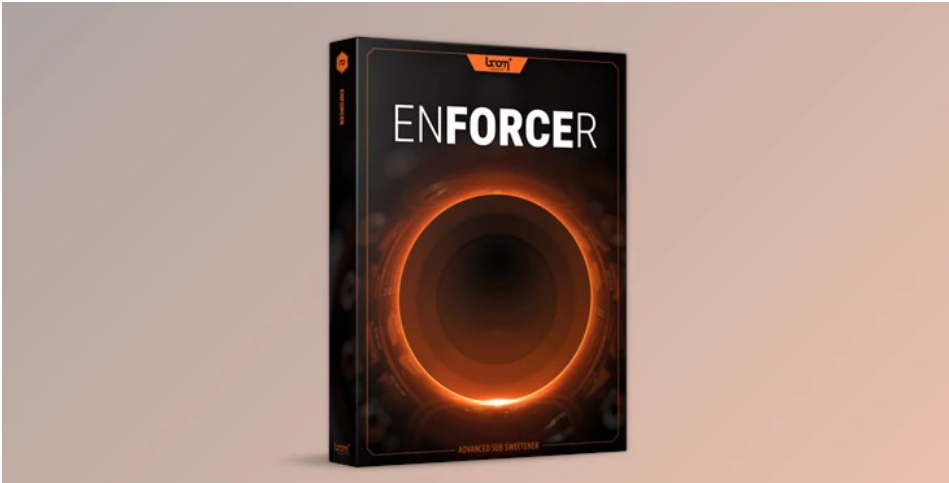

Boom Library – Enforcer v1.2.0-R2R:

YOUR ALL-NEW SUB-BASS POWERHOUSE

ENFORCER, a bass plug that provides irresistible punch, strong body, and a strict non-bass urge to your own samples.

It is possible to greatly beef up sounds or include just a hint of fat. You may use it like a kick-drum synth, swap kick drum tails, and then song them readily with semitones or you may completely exchange given origin noises.

ENFORCER -- A scalpel for punch with unmatched precision.

What's ENFORCER?

Ever wasted your time including sub sweeteners to each and every shot of a completely automatic weapon? Ever got stuck layering a kick drum using controllable and tunable low-end or improve live drums with a nicely defined punch? With difficulty adding continuous weight to each and every footstep? Look no more, Enforcer is your Swiss Army Knife to get punch, noninvasive, sub-par energy, kick... you name it.

- Insert power and punch to a mix
- Triggered by origin sound substance without the need to manually sync it into your paths
- The trigger may be corrected with surgical precision -- apply just and exactly what you need.
- [NEW] Trigger through MIDI -- Now you can"drama" Enforcer in your MIDI keyboard
- Song kick drums and snares with semitones
- Duck origin frequencies to get a totally clean & Skilled mixture
- Easy-to-use bass plug
- Over 115 musical and audio FX presets
