RegEx Wizard v2.1.5 for macOS

2026-04-08 08:51:42

RegEx Wizard is the ideal application for those who wish to learn, experiment, and apply regular expressions (regex) without normally becoming confused. It is a simple tool that allows you to write patterns effortlessly and without stress, no matter what your level of expertise is: beginner or a developer. You can also see what you are matching that is in real-time as you type--there is no guessing, no waiting.

It is accompanied by useful aspects such as a graphic designer to draw patterns without remembering each symbol, and an intelligent validator that tells you when something is erroneous and how to rectify it. You are even able to really test your regex on live data and immediately view all matches, capture groups, and errors, in an obvious way.

After you are done, you can export your pattern as a working code in your favorite programming language, such as Python, JavaScript, Swift, and so on, with **RegEx Wizard**. This tool will save time and provide you with an opportunity to avoid errors, whether you are writing a quick script or creating something large.

Key Features of **RegEx Wizard** :

1. **Real-time Testing:** See how your regex works instantly by testing it on your own text. Matches are highlighted as you type.
2. **Multi-language Code Export:** Export your finished regex as production-ready code in over 10 programming languages, saving time in development.
3. **Visual Pattern Builder:** Build regex patterns using a drag-and-drop interface or guided inputs, making complex patterns easier to create.
4. **Smart Validation:** Get helpful feedback when your regex has a mistake. Errors are explained clearly so you can fix them right away.
5. **Built-in Pattern Library:** Access quick references for common regex components like character classes, quantifiers, and special symbols.
6. **Advanced Regex Tools:** Use additional tools to find, replace, extract, or split text with your regex — perfect for real-world tasks.
