Marissa Gifford – The Streamlined Set:

This set is so dear to my heart as it's the sole reason why any of my personal photos were edited in the last year. The Lightroom, as well as ACR, presets are intended to assist you in enabling you to get out of post-processing as fast as you can, and back to normal. They're simple, easy-to-use presets that are made to provide you with a quick and clean edit, with minimal need for tweaking. More than a year in the creation the Lightroom, as well as ACR, presets were specifically created to allow you to get the most simple edit you can get.
