**Function Loops Vocal Pop 2021:** Our new vocal kit covers the latest trends in modern pop music. Mixing female vocals into these incredible kits will take it to the highest level!

We introduce a new voice to Function Loops' vocalist's roster.

The new collection includes over 500MB of pop voice beats, drums, melodies instruments, music loops, single shot samples, MIDI files, and all the other instruments to assist you in creating your next smash.

Each kit includes all acapellas (dry and wet), lead-back vocals, choruses, backing vocals, and so on. All are available in dry and wet versions to give you more flexibility.

In addition, you'll get a complete collection that contains MIDI files, meaning you'll have total control over what you make. You can edit the MIDI files to add subtle accents, create unique variations, or completely alter the mood or key.

Another excellent option is the one-shot folder containing anything from kicks to bass and snares to pianos, guitars to snaps and hats to synths, and many more.

The sound is carefully prepared and waiting to be inserted into your projects. All sounds are royalty-free, and you can use our sounds in commercial projects with no conditions attached.

**What is Function Loops Vocal Pop?**

"Function Loops Vocal Pop" likely refers to a sample pack or sound library created by Function Loops, a company that specializes in producing high-quality sound samples and loops for music production. In this context, "Vocal Pop" suggests that the sample pack is centered around vocal elements commonly used in pop music production.

"Vocal Pop" is a subgenre of popular music that places a strong emphasis on vocal melodies and lyrics. In Vocal Pop songs, the vocals are often the focal point of the music, and they are typically accompanied by instrumental arrangements that complement and support the vocal performance.
