Made exclusively for The Color Laboratory this set of photoshop activities by acclaimed photographer Kate Woodman brings an Assortment of her trademark cinematic motivated colors to your Pictures!

"Whenever I'm forced to find inspiration, I see my Favorite films and drop into a trance of vibrant mild and rich colors. The Cinematic collection II is my own way of bringing one together with me that Cinematic travel. Inspired by classic film color grading, these activities are designed to enhance tones and deliver an emotive quality to your job. My Aim is To transform your pictures into something which feels just like a still from a picture And helps to enhance your narrative "

Made exclusively for The Color Laboratory this set of photoshop Activities by famous photographer Kate Woodman attracts a range of her signature Cinematic motivated colors to your photographs!

In this Collection, each activity brings an exceptional color palette that compliments a variety Of light setups from organic, to diffuse, to challenging lighting. We encourage you To learn more about the collection, coating the actions in addition to one another, alter the Opacity to match and start the band to amend and correct the layers to match your image.
