

Winsoft DAO Database Collection v6.0 for Delphi & CB 5-12 Athens Full Source

2026-09-26 20:46:53

comprises Delphi and C++ Builder components tailored for seamless access to MS Access databases using DAO (Data Access Objects) and ACEDAO. Supporting DAO 3.6, DAO 3.5, and ACEDAO eliminates the need for the Borland Database Engine (BDE), ensuring fast native data access. Direct access to DAO objects guarantees compatibility with standard Delphi data-aware components, simplifying database integration.

Compatible with Delphi/C++ Builder 5 - 12 and Lazarus 2.2.6, this collection offers broad versatility across different versions of development environments. **Winsoft DAO Database Collection** also provides access to the source code, granting developers flexibility for customization and optimization. Furthermore, distributing these components within applications is royalty-free, ensuring cost-effective deployment.

Key Features of Winsoft DAO Database Collection :

1. Provides Delphi and C++ Builder components for accessing MS Access databases using DAO and ACEDAO
2. Supports DAO 3.6, DAO 3.5, and ACEDAO
3. Eliminates the need for the Borland Database Engine (BDE) for fast native data access
4. Grants direct access to DAO objects, ensuring compatibility with standard Delphi data-aware components
5. Compatible with Delphi/C++ Builder 5 - 12 and Lazarus 2.2.6
6. Source code available in Professional version for customization and optimization
7. Royalty-free distribution of components within applications
