RainFX – Photoshop Extension: Photoshop Extension for generating rain consequences. Variate angle, density, speed, end Strength, amounts of rain to get the desired look.

- Produce rain effects easily. Tweak the parameters to find the best outcome. Rain-X is intuitive, quick, and fun to use.
- Only press the "Let it rain" button And lean back.

Panel UI Controls:

- Angle: the angle of this rain.
- Density: the density of this rain. Blend this With pace.
- Speed: the rate of this rain. Motion blur of The rain.
- Wind power: the end effect on The rain. The higher the amount more wind is blowing and rain has more scattered.
- Degrees of rain: add thickness to the Rain influence by adding higher levels of rainfall.
- "Auto-update" alternative Provides you an Interactive method of creating the rain impact. With every parameter change, The rain automatically upgrades.
- "Merge group" alternative unifies Present rain influence parameters into a single layer so that you can for example produce More versions by altering the parameters and then consolidating the group.

Bonus Suggestion: If the "Merge group" option Isn't allowed every coating inside the "rain_FX" set could be turned off and on so you can tweak the Outcome Even further and therefore attain the look you desire.
