WhatBot Plus v4.6.5 Multilingual

2026-01-09 10:50:26

WhatBot Plus is the ultimate solution for managing your WhatsApp marketing directly from your PC or Mac with its powerful sender and autoresponder functionalities. Designed for simplicity and effectiveness, it offers a range of features tailored to streamline your communication efforts on WhatsApp.

As an all-in-one tool, **WhatBot Plus** serves as both a WhatsApp sender and autoresponder, catering to small to medium-sized companies, businesses, or freelancers relying on WhatsApp for customer communication. With WhatBot Plus, you can automate the sending of WhatsApp messages and set up automatic replies, making it ideal for conducting newsletter campaigns and engaging with customers seamlessly.

The autoresponder feature of allows for dynamic responses to customers based on predefined rules and commands, including sending welcome messages with dynamic menus, offering promotions, and providing relevant information. It also enables the creation of dynamic menus and supports text and multimedia messages for versatile communication options.

On the other hand, the bulk sender feature empowers users to send WhatsApp messages directly from their PC or Mac, even to contacts not saved in the address book. It supports importing contacts from various file formats. It provides advanced functionalities such as message customization with variables and scheduling for sending messages, ensuring efficient and personalized communication with your audience.

Key Features of **WhatBot Plus**:

1. Dynamic Chatbots: Offer users multiple options with dynamic navigation menus.
2. Contacts Registration: Automatically register users who contact you on WhatsApp.
3. Multiple Contents: Send static text, images, web links, emojis, etc.
4. Import/Export Contacts: Easily import or export contact lists with name and number information.
5. Auto Responder: Automatically responds to customers based on configured rules and commands.
6. Welcome Message: Automatically send welcome messages with dynamic menus and commands.
7. Command Automation: Set up commands to automate sending offers or providing information.
8. Multimedia Messaging: Send text responses and multimedia messages with images, links, and emojis.
