How to provide the possibility to reconnect the keys of the switches, and change the tone to the bass in Sound Effects?

You can use "SubMission Audio GroveBass".

Where can I download the product?

After subscription, You can download it for free from here.

- The first virtual bass was designed to capture the specific sound of a player. Simon Grove (Plini, Helix Nebula, etc.).
- Every fret Multi-sampled. Match guitar performances 1:1.
- Interactive fretboard.
- Utilize String Force String to program precisely which note's string is being played.
- New articulations: Slap/Pop Ghost Slap/Pop Tapping TruLegato.
- Completely revamped truBass slides. Slide exactly how you would like with start/endnotes for your program and have realistic energy decay in time.
- Utilize the Force String to program precisely what the note's string is being played.
- Pitch Bend as high as 12 semi-tones! (or remain sane and stick to 2)
- Full raw DI, and four of Simon's custom-made tones.
- The "Mixer" tab permits the tweaking of each tone to a certain extent.
- The Humanize feature is new. It goes from Machine to "Bassist".
- The 'Position' knob functions as a virtual capo, which means that notes only play above the fret that is selected in the event that they cannot be played below it.
- "DOOM" mode: reduces the number of samples, only uses the best, most clear, and punchy samples, and then increases the speed.
- The same old industry-leading alternative Picking picker that many are familiar with and who love DjinnBass.
- Settings Menu allows rebinding Keyswitches, changing the tune to the bass as well as changing the range of bends.
