Cel and 2D Animation: Streamline your Workflow in Procreate Dreams: Introducing Procreate Dreams, the all-in-one app for creating hand-drawn 2D and Cel animations from conception to composition. Join art director and animator Danni Fisher-Shin, known for her work in Olivia Rodrigo's "brutal" music video and creative campaigns with brands like Apple, Google, and Facebook, as she walks you through the process of creating professional, fully completed, and composited animations using Procreate Dreams.

In this class, Danni will guide you through creating an original animation, showcasing Procreate Dream's capabilities, such as adding keyframes, creating camera movement, and performing and grouping keyframes and layers.

You'll learn how to:

- Keyframe camera movement
- Create dynamic backgrounds
- Animate loops within groups
- Utilize the Performing feature to animate your hero element
- Add customized animated elements for depth and color

Additionally, you'll gain insights into Danni's workflow and learn how she creates her work as a full-time animator.

Whether you're a seasoned animator looking to streamline your process or an entry-level animator exploring new software, this class will boost your confidence in using Procreate Dreams for all your animation projects. Animation experience in software like Photoshop, After Effects, or Procreate is suggested. You only need Procreate Dreams, an iPad, and an Apple Pencil to start. This class was filmed using Procreate Dreams 1.0.5.
