Exotechnic Corporation CodeTrigger Professional v6.3.0.5 (05 May 2021) for VS 2019

2026-09-06 23:15:00

CodeTrigger is a C# code generator accessible as a standalone product on Windows or incorporated into an own Visual Studio development environment.

CodeTrigger is intended to utilize SQL Server, Oracle, MySQL, import pre-defined database schemas, and model the connections on your multi-tier WPF/WCF/Winforms/Internet program, hence leaving your staff free to focus on higher-level domain technicalities.

With a single click on the shoot button, then create PL/SQL Programs and Stored Procedures, Inline-SQL, Data Layer courses, Business Domain Name classes, and WCF Interfaces, together with applicable WPF Winforms, ASP.net sample code to get you started.

CodeTrigger is a Code Generation tool that integrates with Visual Studio 2015-2019 and SQL Server, Oracle, and MySQL. Combining the best pieces of ORM-like performance and Code Generator in a single, CodeTrigger retrieves schema information from the database and builds data and business domain models based on your own favorite settings. Create C#, MVC, WPF, WCF, SQL, information domain courses, and company domain classes based on your own favorite settings, such as typed groups, partial courses, typed lists and set direction, stored procedures, and /PL-SQL bundles. In addition to WPF, WCF, WinForms, Microservices, RestApi, WebApi, ASP.Net WebForms, Angular8+, and MVC/Javascript samples. Customize the classes that are created for your custom purposes, with partial classes, inheritance, aggregation, composition, repository layout, multiple databases/data resources, interface definitions, service for dependency injection using Unity or Ninject, support for Unit of job routine, IOC pattern, Logging and Exception handling.

Available as a standalone program (such as VSExpress users), on the command line, or as an add-in for either Visual Studio or Sparx Systems Enterprise Architect. Compatible with Web Framework 4.6.1, Internet Core 2.0+, SQL Server 2005+, Oracle 11g/12c, MySQL 5.5+, Azure SQL Server

Multi-tier Wizards, Extensive customization, the creation of 100 percent C# code documents, NO third-party/Vendor Assemblies on your final product, extensive detailed sample generation/tutorials, the capability to create code for numerous kinds of data sources concurrently, e.g., operate on a job using an Oracle DB AND a SQL Server at precisely the same project/solution.

These features and much more guarantee that CodeTrigger brings immediate added value for your development process, instantly enabling your professional programmers and development staff to concentrate on the larger picture.
