Other   .Net   Components

Easy Database Creator has the ability to automatically add the primary as well as the foreign keys. The database management tools are capable of putting the user through the process of manually defining the kids that are primary as well as the foreign key along with the foreign key indexes for the user and the developer respectively. It has the intellisense for the names of the columns, as well as the data types, along with the length of the data. It has the ability to rapidly create database schema as well as script and the user has the ability to connect to the SQL Server database which is already existing and also switch to the database type basically to the SQLite create a database which is based on the schema of the SQL Server database. It has the ability to generate C# as well as the classes of VB.NET from the tables easily and flexibility.

Kellerman Software Easy Database Creator Great Features:

It has the following features on attributes that are stated as below such as:

- It has the ability to support multiple databases and also has the ability to support the process of creating schemas for the Firebird, SQLite, SQL Server, MySQL, Oracle and a few more to be mentioned. It also has the capability to switch to another database as well as type anytime that he desires.
- It is capable of creating a database schema without even having to be connected to a database or even load the schema from the database which is already existing.
- Adding to a child table, parents table or even, that automatically added primary key, foreign key, the constraint of the foreign key, as well as the index of the foreign key.
- The user has the ability to add columns with the intellisense for the name of the column, add to type as well as length. It has the ability to remember new keywords, data types, and hence the key words can be edited by the user.
- Renaming of the bulk field that are containing spacers to the Pascal cases, as well as the Paschal underscore, or even the lower underscore case.
- The user has the ability to purchase today and receive the new products and upgrade for free for the next year.
- Receiving a refund by the user within 60 days is possible if the user is not satisfied with the purchase.
- It is capable of providing a lifetime support to the user by email services.
