Luminar Neo v1.22.1.14175 (Win, Mac-v1.22.0): The Luminar software is created to be user-friendly for users with different skill levels. Its simple AI-powered controls simplify multi-step tasks.

How to turn your imaginative ideas into reality?

You can turn your ideas into reality using "Luminar Neo".

Where can I download the product?

After subscription, You can download it for free from here.

Luminar Neo is a revolutionary artistic image editor that empowers creative visual artists to create their most imaginative ideas into reality. Luminar Neo builds upon the distinctive, purpose-driven AI editing techniques that Skylum is now known as.

Are you prepared for the new Luminar Neo update? We're excited to present the improvements made by Luminar Neo 1.12.0 with you.

Within Extensions, users will see significant improvements in the quality of your images through UpscaleAI. You'll now be able to reduce individual Extension panels within the Catalog view. This includes HDR Merge Focus Stacking or UpscaleAI. This will give you a more personalized and more user-friendly experience. There are also interface improvements that apply to NoiselessAI, SupersharpAI, and Magic LightAI.

Also, support has been added to the Sony ZV-E1 camera and Sony FX30.

In addition, you can also get more information about each tool by pressing the "I button" beside each tool. There are also explanations for all five tabs in Luminar Neo (Catalog, Presets Edit, Extensions, and Export) in the onboarding process.

You can also purchase new creative assets like Skies and Presets from the Luminar Marketplace directly in Luminar Neo's Extras tab.

You'll notice stability and performance enhancements when editing FaceAI, MaskAI, and SkyAI.

The Luminar Neo 1.10.0 is faster and more stable since we've fixed and uncovered several bugs. Upgrade now and enjoy the most recent version of Luminar Neo!

MacOS

Fixes for bugs:

- Shut down your Background RemovalAI tool before the conclusion of the process without observing the galaxy's motion still moving.
- Click the Add Custom Sky button within the category of custom skies.
- Utilize Develop Raw, the Develop Raw tool, and preview DCP in hover mode without Luminar Neo saving it as an action to Undo/Redo.
- Reset Presets while keeping settings for the Crop settings.
- Reset a Preset to an image, Then open another image and immediately see Preset previews without the previews slipping into Generation mode.
- Make two duplicate edits to Clone, Erase, Portrait BokehAI, or Dodge and Burn without any irrelevant edits appearing on your image.
- Use the Portrait BokehAI, Undo, and Redo the edit. Then, start to Develop Raw. Open the Develop Raw tool in the Edits tab. You'll be able to see the Undo/Redo function accessible.

Windows

Fixes for bugs:

- Make two edits using Clone Erase BokehAI, Portrait BokehAI, and Dodge and Burn, then apply Redo expand the Clone tool, and observe the results you expect to see.
- Utilize the Undo/Redo feature as you would expect in masking mode on the Edits tab. Edits tab.
- Do an edit, but without opening the Edits tab being opened without prompting.
- Select any tool with an earlier open "Share to" pop-up without deactivating additional tools.
- Press the remove dust spots or powerlines buttons and then move to a new image without the removal moving on to the following image.
- "As the latest member of the Luminar family, we designed Luminar Neo to allow artists to take on more challenging image creation work and achieve results that often seem unattainable," said Dima Sytnik Skylum's co-founder and CPO. Skylum.
- Luminar Neo is meant to be a program that provides more customization options and expands on the company's LuminarAI software. Both applications are available in tandem.
- Luminar Neo will ship with many new features, such as background layers, image layers and relighting options, dust removal, and more. The program analyzes every image to determine the size of the scene as well as the contents of it, allowing it to control the scene with precision.
