2025-01-01 21:53:31

is a versatile software library created for developers who need to convert Excel files into PDF, Word, RTF, and DOCX formats. This tool is entirely written in C# and supports both .NET Framework and .NET Core, making it highly compatible and efficient for handling various document formats. Whether dealing with old Excel files from 1997 or the latest ones from 2019, this library can manage multiple worksheets, ensuring that all text styles, colors, and detailed formatting are preserved.

SautinSoft Excel to PDF .Net stands out because it does not require Microsoft Office or Adobe Acrobat to function, allowing it to run independently on different platforms like Windows, macOS, and Linux. This makes it a great choice for developers working with any .NET environment. Additionally, its performance is optimized for speed and memory efficiency, which is particularly beneficial when dealing with large and complex documents.

Deployment is streamlined and flexible, supporting Azure and AWS cloud services and facilitating easy integration into modern cloud-based architectures. The provided developer guide offers more than 50 examples, making it easy for developers to implement and customize the library according to their needs.
