Articulated Sounds – Bones & Blood:

Flexible and valuable gore resources for sound design.

The library was created with the goal of providing super high-quality malleable materials for sound artists with a wide range of organic options in the genre of gore/horror.

Each file contains a vast variety of variations on the identical sound. However, the wide frequency range offered by the Sanken co-100k and Sennheiser MKH-series of microphones permits extreme pitch shifting.

Disclaimer: No human beings or animals were hurt during the construction of this library

- diverse impacts made by hand slaps, stabs, and stomp. crush, slam, and blood spurt
- slimy squeezes and twists gross goo and flesh
- different techniques and manipulations, and even different manipulations, and
- The juicy flesh squirts out and the filaments pull
- bones snapping, snaps and cracks
- blades ringing, as well as numerous howls
- body parts falling into bloodbaths, spurts, and spatters
