Disk Pulse Pro / Ultimate / Enterprise v18.0.16 + Activator

2026-04-19 10:09:13

Disk Pulse is a real-time disk change monitoring solution designed to enhance system security and efficiency. With the ability to monitor one or more disks or directories, it tackles stubborn malware by providing constant updates to its database, ensuring users are protected against emerging threats. The software cleans up unnecessary files, optimizes overall computer performance, and safeguards against online threats such as Trojans and spyware, offering robust process protection.

The core functionality of lies in its real-time interception of file system change notifications issued by the operating system. It swiftly detects and responds to newly created, modified, deleted, or renamed files, triggering email notifications, executing custom commands, and generating comprehensive disk change monitoring reports within seconds of critical changes. The user-friendly interface and pie charts for categorizing and filtering detected file system changes contribute to a seamless user experience, providing valuable insights through statistical representations.

Disk Pulse comes in various versions, including **Disk Pulse** Ultimate and **Disk Pulse** Server, offering server-based capabilities for monitoring multiple disks simultaneously, sending reports to a centralized SQL database, and conducting history trend analysis. The enterprise version, **Disk Pulse** Enterprise, introduces advanced features like centralized analysis and email notifications based on user-defined rules. Moreover, **Disk Pulse** supports command-line utility, enabling power users and IT administrators to integrate disk monitoring capabilities into batch files and shell scripts. It is a versatile and comprehensive solution for disk monitoring and system security.

Key Features of **Disk Pulse**:

1. Real-Time Disk Change Monitoring
2. Malware Detection and Removal

所有软件资源 100%安全 已检测 无病毒 无篡改
