

Keyoti RapidFindReplace WPF v1.0 Ratail

2026-09-06 23:14:07

RapidFindReplace WPF permits developers to rapidly incorporate a strong find & replace dialog instrument to WPF programs. Boost user experience with the capacity to track down & replace text strings inside text boxes, files, and dozens of controllers. RapidFindReplace also includes advanced user options such as Wildcards, Regular Expressions, Case Sensitivity, Complete Word, and a lot more.

- 'Locate only' or find and replace' style.
- Templated
- Support for broad Selection of WPF controllers, e.g. ;
 - TextBox
 - RichTextBox
 - ComboBox
 - DataGrid
 - Label
 - ListBox
 - ListView
 - TreeView
 - FlowDocumentPageViewer
 - FlowDocumentScrollViewer
 - Button (disabled by default)
 - IContentHost Controls
 - The non-visual assortment of Run objects (i.e., Strings)
 - Controls with these as child controls (e.g., UserControl, Window, etc.)
- Multiple user choices like those in Office applications
 - Locate as consumer forms (inline highlighting)
 - Case fitting
 - Entire words only
 - Wildcards
 - Regular expressions
 - Prefix/suffix only fitting.
 - Ignore whitespace
 - Ignore punctuation
