

JitBit ASP.NET Forum v8.3.1

2026-10-07 08:28:21

The famous"Jitbit ASP.NET forum" - a .NET message board program. Easily integrated into the present. NET-websites (both layout and authentication).

Jitbit Forum (formerly called"Jitbit AspNetForum") is an ASP.NET forum/discussion plank program. Download and put in a forum for your ASP.NET-based website in moments - by the founders of Jitbit Help Desk System

Our forum readily integrates into existing ASP.NET-based sites, optionally providing a"single-sign-on" performance for your present users.

"Jitbit's AspNetForum is fast" - Scott Hanselman, blogger, author, Microsoft Internet Team architect.

The Forum program is constructed with all the C# language; you can get the source code version if you would like. The Forum can be used with MS SQL Server, MySQL, and even Access database motors.

Easily personalize the look-and-feel for the discussion, configure the forum to take your present customers (through ASP.NET authentication or built-in Auth-API"). More information

Produce user groups, assign reading and posting permissions to customers, medium messages, trigger user accounts by email, and much more.

Jitbit's ASP.NET forum allows users to sign in using their Twitter and Facebook accounts. Just define your Twitter/Facebook"API key" from the settings, and it works from the box! OpenID can also be encouraged - log in using a Google/Yahoo/ accounts.

Potential Windows-integrated authentication - incorporate this message board with your existing Active Directory users catalog.
