SDL Trados Studio 2024 Professional v18.1.4.6694

2026-05-18 09:48:36

DL Trados Studio is the top translation software used by professional translators who want to review and translate projects, utilize terminology, and make the most of machine translation with one easy desktop application.

The ability to deliver translations and content localization in a timely and efficient manner is a significant challenge for every professional in translation. That's why the localization and translation teams employ Computer-Assisted Translation (CAT) tools to assist them in working quickly and handling their translation projects more efficiently. Trados Studio is a market-leading CAT software with more than 270,000 users, meaning it is the biggest community of professionals working in translation around the world.

RWS is a long-standing tool for CAT. Suppose you're part of the Trados Community. In that case, you'll be able to access the most extensive range of translation software and training materials, industry knowledge, events, and multi-lingual educational materials anywhere in the world of localization.

SDL Trados Studio Great Features:

- **Speed up the delivery of your projects.** You can easily reuse previously translated material across all your projects using intelligent memory for translation (TM) technology. Innovative features like AutoSuggest predictive typing and high-quality neural machine translation (NMT) are accessible from inside Studio and will allow the speed of your translation work.
- **Find jobs from anyone.** Translate using an extensive range of languages and working on various file types. Work on projects safely while traveling using Trados Live; use your laptop, tablet, or mobile device and seamlessly sync to your desktop application. It is also possible to create new projects, keep track of your progress in translation, and view the progress of your project while traveling with your phone using the brand new Trados Live app.
- **You can ensure consistency and high-quality translators.** Make use of our tools for managing your terminology MultiTerm and automated Quality Assurance (QA) tests within Studio to ensure consistency across your translations.
