Expressions are small snippets of code written in JavaScript that permit users to create animations that are impossible to create manually. They're among the most effective motion design tools in Adobe After Effects. Motion designer Desmond Du has been using expressions in collaboration on projects with NBA, Turner Classic Movies, Adobe, and Cartoon Network.

In this online class, Desmond will show the students how to program expressions to build complicated animation rigs with elegance and style. Learn how to apply various methods to create a set of geometric abstract animations that can be compiled and merged into the final product.

What's this course's main project?

Create a 25-second opening sequence for a film using mathematical equations and expressions to build complicated animation rigs.

Who do you think this online course is for?

This course is designed for intermediate and advanced After Effects users with basic knowledge of expressions who wish to incorporate math, coding, and science into their creations!

Materials and requirements

All you require is a computer that can access After Effects and previous experiences with the program.

Course Content

- 01 About Me.mp4
- 02 Influences.mp4
- 03 Understanding the Assignment.mp4
- 04 The Basics of Coding.mp4
- 05 Step Repetition Transforming Properties.mp4
- 06 Step Repetition Animating with "valueAtTime".mp4
- 07 Step Repetition Working with Effects and Layers.mp4
- 08 Randomization Animating Multiple Layers.mp4

What is Advanced After Effects Coding for Motion Design?

In this online course, motion designer Desmond Du will guide you through mastering JavaScript expressions in Adobe After Effects to create sophisticated animation rigs with flair. With expressions, you can achieve animations that would be challenging or impractical to create manually, making them a powerful tool for motion design.
